New edition greatly expanded

The second edition of this organizations, institutions, programs, and services covers over 30% more than the previous edition. The entire has been thoroughly revised and four new sections have been added.

A unique one-stop reference.

The directory offers a consolidation of information heretofore widely dispersed in general reference books. And much new material not available elsewhere has been gathered solely for inclusion here.

Entries provide full details

Unlike other directories in the field, the *Medical and Health Information Directory* is not just another "names and numbers" book. Entries provide not only basic details most often sought—such as names, addresses, phone numbers, key personnel—but also descriptive annotations where pertinent.

Conveniently arranged and indexed.

The coverage of subject matter in the 36 sections includes clinical medicine, the basic biomedical sciences, and technological and socio-economic aspects of health care. Indexes are supplied for many sections.

Reviewers Assess the Directory...

American Reference Books Annual 1978: "The extraordinary usefulness of this compilation is hard to overstate. . . . Recommended for reference use for general libraries, both public and academic, and for medical libraries, both small . . . and large." (Shirley B. Hesslerin)

Choice: One of the Outstanding Academic Books for 1978. (May 1979) "An important addition to the ready-reference shelf of all health science libraries. Recommended also for public libraries and community college libraries." (June 1978)

Library Journal: "Included in Sci-Tech Books of 1977: One hundred outstanding titles for general library collections. "There is bound to be something of interest and value to anyone needing health-related information. . . . If the library has no other similar subject coverage to me, this one is definitely an excellent choice." (March 1, 1978)

Postgraduate Medicine: "This volume can literally replace a whole shelf of directories." (Allan J. Ryan, MD, July 1978)

"Reference and Subscription Books Reviews": "No comparable directory containing such varied health-science information comes to mind. . . . The information in this book is well presented. . . . Recommended." (Booklist, July 1, 1978)

Wilson Library Bulletin: "Will be valuable in public, academic, and medical libraries." (Charles A. Bunge, "Current Reference Books," April 1978)
